RE: Notice of Tentative Determination  
MacDermid, Inc.  
Waterbury, CT.  
EPA I.D. No. CTD001164599

Dear Mr. Podgurski;

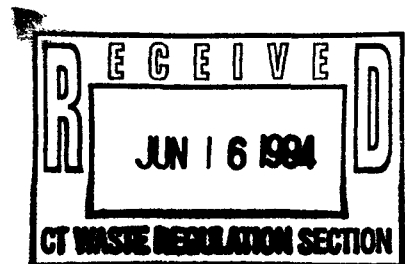

Enclosed are copies of the Notice of Tentative Determination which will appear in the Classified Section of the Waterbury Republican-American on May 17, 1994 and broadcast on WATR (AM) on May 17, 1994. Copies of the Notice of Tentative Determination and the RCRA and State 22a-454 permits have been enclosed. Should you have any questions or concerns regarding this matter please do not hesitate to contact John M. Berg, Sanitary Engineer at (203) 566-4869.

Sincerely,

Richard J. Barlow  
Chief  
Bureau of Waste Management  
Waste Engineering and  
Enforcement Division

NOTICE OF TENTATIVE DETERMINATION

MacDermid, Incorporated  
Waterbury, Connecticut  
EPA I.D. No. CTD001164599

The following is a Notice of Tentative Determination from the Connecticut Department of Environmental Protection ("DEP"):

The DEP has made a tentative determination to issue Resource Conservation and Recovery Act ("RCRA") hazardous and 22a-454 waste storage and treatment facility permits to MacDermid, Incorporated, located at 526 Huntingdon Avenue, in Waterbury, CT. The proposed permits establish the necessary standards and conditions to ensure that the facility complies with all State and Federal RCRA hazardous and State 22a-454 waste management regulations. The permits will allow MacDermid, Inc. to continue to store and treat (recycle) RCRA hazardous and 22a-454 wastes in containers and tanks.

The draft permits, a fact sheet, and other materials are available for public inspection at the DEP offices on the fourth floor at 79 Elm Street in Hartford, CT and at the Office of the Town Clerk at the City Hall, 235 Grand Street in Waterbury, CT. Comments on the draft permit or requests for a public hearing are invited from interested persons. Prior to making a decision to approve or deny the permit, the DEP will consider all comments which are received by June 30, 1994.

For more information regarding the draft permit contact John M. Berg, Sanitary Engineer of the DEP, Bureau of Waste Management at (203) 566-4869.

### NOTICE OF TENTATIVE DETERMINATION

MacDermid, Inc.  
526 Huntingdon Avenue  
Waterbury, Connecticut 06708  
EPA I.D. No. CTD001164599  
DEP/HWM-151-028

The Department of Environmental Protection ("DEP") has made a tentative determination to approve an application submitted by MacDermid, Inc. ("the applicant") pursuant to 22a-6, 22a-449(c) and 22a-454 of the Connecticut General Statutes ("C.G.S.") for permits to operate a Resource Conservation and Recovery Act (RCRA) hazardous waste and a 22a-454 State waste management facility. The applicant has been operating the facility under interim status as provided by Section 22a-449(c) of the C.G.S. since 1980.

The name and address of the permit applicant are: MacDermid, Inc., 526 Huntingdon Ave., Waterbury, CT 06708. The proposed activity will take place at: 526 Huntingdon Ave., Waterbury, CT. The proposed activity will not affect any natural resources. Interested persons may obtain copies of the application from Cherrie Gillis, Manager/Regulatory Affairs, MacDermid, Inc. (203) 575-5700. The application, draft permit, fact sheet and other materials are available for inspection by contacting John M. Berg, Sanitary Engineer at the office of the DEP, Bureau of Waste Management, 79 Elm Street, Hartford, CT 06106-5127, (203) 566-4869 from 8:30 - 4:30 Monday through Friday excluding state and/or federal holidays and by contacting Ms. Patricia M. Mulhall, Town Clerk, City Hall, 235 Grand Street Waterbury, CT 06702, (203) 574-6806 from 8:30 - 4:30 Monday through Friday.

The Commissioner of DEP is authorized to approve or deny RCRA hazardous waste facility permits pursuant to Section 22a-449(c) of the Regulations of Connecticut State Agencies ("RCSA"), and may approve or deny a 22a-454 waste permit pursuant to Section 22a-454 of the C.G.S. On the basis of a review by staff members of DEP in accordance with Parts 264 and 270 of Title 40 of the Code of Federal Regulations, Section 22a-449(c) of RCSA and Section 22a-454 of the C.G.S., the Commissioner of DEP has made a tentative determination that RCRA hazardous and 22a-454 wastes can be properly managed at the facility.

Draft RCRA hazardous and 22a-454 waste treatment and storage facility permits have been prepared for the MacDermid, Inc. facility. These permits are for: (1) receiving RCRA hazardous and 22a-454 wastes from off-site, and (2) storing RCRA hazardous wastes for greater than ninety (90) days prior to treatment (recycling) on-site or disposal off-site. Specifically, MacDermid, Inc. proposes to manage RCRA hazardous and 22a-454 wastes generated from their chemical product manufacturing processes, received from customers and received from other MacDermid facilities. MacDermid's waste management activities involve on-site storage and treatment (recycling) of the waste. The facilities capacity: for containerized waste storage is 88,550 gallons and 26 cubic yards for five (5) separate permitted container storage areas; for tank storage and treatment, 29,000 gallons for four (4) permitted tanks. No RCRA hazardous or 22a-454 wastes are disposed of on-site.

All RCRA hazardous and 22a-454 wastes generated on-site and received from off-site are either treated on-site or shipped off-site to an approved and/or permitted facility. The draft RCRA hazardous and 22a-454 waste permits contain terms and conditions that are designed to include all performance standards applicable to the facility in accordance with the above cited statutes and regulations, as well as additional conditions deemed necessary by DEP in order to protect human health and the environment.

All interested persons are invited to express their views on the tentative determination concerning the draft permits. Written comments on the draft permits or a request for a hearing shall be submitted no later than June 30, 1994, forty-five (45) days after publication of this notice. A request for a public hearing shall be in writing and shall state the nature of the issues proposed to be raised in the hearing or the reason for opposition to the draft permits. Comments shall be directed to: John M. Berg, Sanitary Engineer, DEP, Bureau of Waste Management, 79 Elm Street, Hartford, CT 06106-5127. The Commissioner shall hold a public hearing whenever he or she finds, on the basis of requests, a significant degree of public interest in the draft permit.

The State of Connecticut has received final authorization to administer the RCRA hazardous waste program in lieu of the Federal Government. Therefore, Hazardous waste facilities in Connecticut are immediately subject to and must comply with all applicable Connecticut hazardous waste requirements found in RCSA, Sections 22a-449(c)-100 through -110 and 22a-449(c)-11. In addition, DEP issues 22a-454 permits under Section 22a-454 of the C.G.S. Should the DEP issue final RCRA hazardous waste and 22a-454 permits, the permits will address all aspects of the Connecticut hazardous waste and 22a-454 waste programs.

Richard J. Barlow, Chief  
Bureau of Waste Management  
Department of Environmental Protection
